Model-predicted lines should resemble observed data line 0.015 Density 0.010 0.005 0.000 100 150 200 labs_ldl Observed data — Model-predicted data

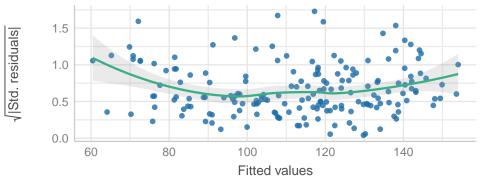

Linearity Reference line should be flat and horizontal

Homogeneity of Variance

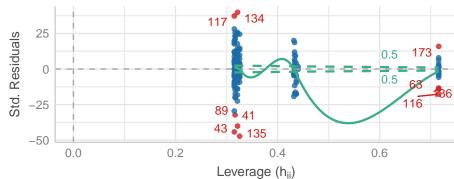

Posterior Predictive Check

Reference line should be flat and horizontal

Influential Observations

Points should be inside the contour lines

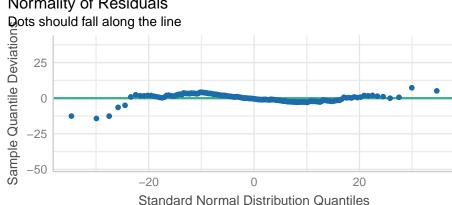

Collinearity

High collinearity (VIF) may inflate parameter uncertainty

Normality of Residuals

Normality of Random Effects (record_id)

Dots should be plotted along the line
