Posterior Predictive Check Model-predicted lines should resemble observed data line 0.04 Density 0.03 0.02 0.01 0.00 20 dass_score_stress Observed data — Model-predicted data

Homogeneity of Variance Reference line should be flat and horizontal

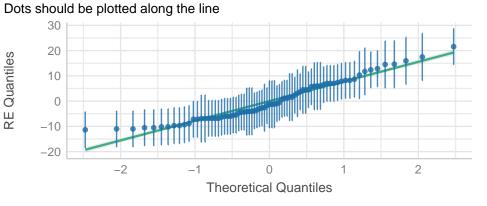

Collinearity High collinearity (VIF) may inflate parameter uncertainty

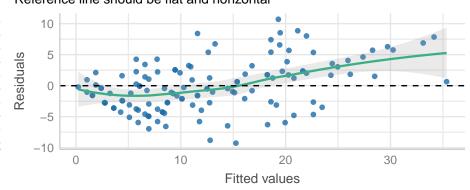

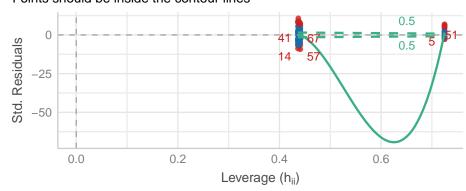

Normality of Random Effects (record_id)

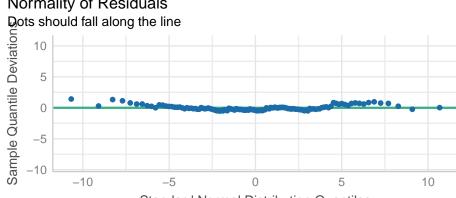

Linearity Reference line should be flat and horizontal

Influential Observations Points should be inside the contour lines

Normality of Residuals

Standard Normal Distribution Quantiles
