Posterior Predictive Check
Model−predicted lines should resemble observed data line

Observed data — Model−predicted data
Linearity
Reference line should be flat and horizontal
Homogeneity of Variance
Reference line should be flat and horizontal

# Influential Observations
Points should be inside the contour lines

Collinearity
High collinearity (VIF) may inflate parameter uncertainty

Low (< 5)

Normality of Residuals
Dots should fall along the line

Normality of Random Effects (record_id)
Dots should be plotted along the line
